THIS IS UNEVALUATED INFORMATION

50X1-HUM

1. In August 1949, work was begun on a hydro-electric power station, to be constructed on the Gijajna River which flows into the Moraca River north of Lake Scutari. An artificial lake was being made in the upper reaches of the river, near the village of Milese, to harness water to supply the power station at Tuzi.
2. Workers' huts had already been erected at Milese and about four thousand persons of both sexes, mostly from Macedonia and Montenegro, were employed.
3. Following the completion of the lake, construction was to begin on the canals and subterranean pipes which would carry the water to a point above Tuzi, whence it would descend to the power station at a rate of sixty-five meters per second.
4. The power station, which must be completed within one year, would furnish energy to the pumping stations engaged in draining Lake Scutari. It will have a greater output than the power station already completed near Glava on the Zeta River and the one under construction at Djelopavlice. The turbines for these power stations were manufactured in the workshops of the Titostroj combine in Ljubljana.
5. Technicians and other personalities are:

| | | |
|-------------------------|---|--|
| Engineer Egon Brusac | : | In charge of excavations |
| Engineer Stefan Turkalj | : | Technical director |
| Mihail Dujmovic | : | Chief administrator |
| Gojko Tasic | : | Political Commissar and Chief of Agit-prop |
